

## CORN INDUSTRY – WEST JAVA

### Project Description

PT Perkebunan Nusantara VIII will develop a diversification program through planting corn commodities in the context of utilizing land and empowering communities around plantations. These commodities have wide open market opportunities and are in line with the Ministry of Agriculture program.

Planting corn is planned to be around 11.000 Ha. The plan is based on the increase in the need for corn for animal feed which is very high and will continue to grow providing a great opportunity for the growth of corn commodities.

PT Perkebunan Nusantara VIII is open to accept offers of cooperation with companies that are interested in investing as well as playing a role in community empowerment.
